

Capability Statement

Aleron Technologies provides a comprehensive range of IT Security Services and Solutions to the Federal Government (Civilian, DOD, and IC). We understand IT security architecture models and maintain currency on an array of FIPS and NIST Special Publications. We have experience in performing all phases of the authorization process using the NIST Risk Management Framework (RMF) and Defense Security Service (DSS) NISPOM. We provide full program security support services including FISMA compliance, policies and procedures, assessment & authorization and continuous monitoring.

Core Competencies

Our core capabilities are providing cyber security and information assurance services. We seek to continuously improve our client's ability to monitor and improve the confidentiality, integrity and availability of their federal information systems by adhering to federal standards such as FIPS 199, FIPS 200, NIST SP 800-37, NIST SP 800-53, DODI 8500.01 and DODI 8510.01.

Cyber Security

- Risk Assessment
- Access Controls
- Identification & Authentication
- Audit & Accountability
- Communication Protection
- Assessment & Authorization
- Continuous Monitoring
- Vulnerability Management
- Incident Detection & Response

Security Compliance

- NISPOM/NIST/FIPS/RMF
- DSS Audit Inspections
